Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Response to Arguments

Applicant's arguments with respect to claim 2,18,20,21 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 2,17-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Akahira (US 6471352) and of Ueno (JP 09-166783) in view of Ben-Zur (US 20050179708).

Akahira discloses (figure 27C) providing a substrate having a plurality of unit panels formed thereon, loading the substrate onto a stage (Fig. 1, 52) and forming an alignment layer on the substrate to have a uniform thickness selectively dropping ink onto a first one of the unit panel regions by a dropping unit (Figure 1, items 55 and Figure 3, nozzles 108), having a plurality at least one head each head having a plurality of holes (Figure 27D). Wherein the selective dropping of the alignment material onto the substrate.

Akahira does not disclose dropping alignment material. Nor does Akahira disclose the specific movement of the alignment material dropping unit.

Art Unit: 2871

Examiner is using Ueno as a reference to disclose that using the dropping unit panels can be used for dropping alignment material. (Abstract)

Examiner is using Ben-Zur to disclose the specific movement of the dropping unit. Ben-Zur discloses positioning dropping unit at a first side of the stage ([0047]) driving the alignment material dropping unit from the first side to a second side (x axis) of the stage to drop the alignment material through holes along a plurality of first dropping paths along a first dropping directions shifting (y axis) the alignment material dropping unit by a predetermined distance along a direction substantially perpendicular to the first dropping direction driving the alignment material dropping unit from the second side to the first side of the stage to drop the alignment material through holes along a plurality of second dropping paths wherein the second dropping paths are disposed between first dropping paths.

It would have been obvious to one of ordinary skilled in the art to modify Akahira's method of forming color film using a plurality of unit panels to include Ueno's method of forming an alignment film that uses a plurality of unit panels to prevent a decrease in the display performance by providing a uniform orienting film (Abstract). Also, to include Ben-Zur et al's dropping unit movement motivated by the desire to provide a more efficient way of dropping material on a substrate [0005].

Allowable Subject Matter

Claim 3 is allowed.

The following is a statement of reasons for the indication of allowable subject matter: The shift distance of the alignment material dropping unit is smaller than a distance between the holes.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
